Subject: Thursday afternoon: Bremerton Gasworks Meeting

I forgot to mention in our planner meeting, I am going to the Bremerton Gas Works (Superfund site) Update on Thursday afternoon. If anyone wants to come to the meeting with me, it's from 1 to 3 at the Cascade Natural Gas office here in Bremerton.

(info below)

Subject: Bremerton Gas Works Update

Hi all-

Happy New Year! I wanted to provide you with the latest update on the Bremerton Gas Works Superfund Site. Cascade Natural Gas and their contractors (Aspect and Anchor QEA) began the remedial investigation last summer. The upland investigation has included the geophysical investigation, source characterization, and continues with source area investigation. The marine area investigation has included a video transect survey, surface sediment sampling, shellfish survey, and subsurface sediment investigation. The investigation will continue this year with groundwater monitoring and surface water sampling. The Phase I Data Report is expected June 5, 2019.

I wanted to survey everyone on the interest of CNG holding an informational meeting to provide further details on their work and what the initial data shows. The data is not yet fully validated.

If you have further questions, please feel free to call me. Thank you.

Eva
